

INE410154 - Applied Machine Learning
Thursdays - 14h to 16h30 - Room INE313
Prof. Jônata Tyska

Homework 2 - Assignment Evaluation Rubric

	Expert	Proficient	Novice
Dataset Selection: Capacity to select a data set that fits the final project's objective	2 points The data set perfectly fits the final project objectives	1 point The data set reasonably fits the final project objectives	0 point The data set does not fit the final project objectives
Analysis: Quality of the exploratory data analysis performed	2 points The analysis allowed a perfect understanding of the data and found many insights	1 point The analysis allowed a reasonable understanding of the data and found few insights	0 point The analysis did not allow the data understanding and did not find insights
Preparation: Identifying data quality issues and solving them	2 points All data quality problems were identified and solved	1 point A few data quality problems were identified and solved	0 point No data quality problems were identified
Presentation: Capacity to clearly present the analysis performed, and discuss its specifics	2 points The visuals (slides) used and the oral presentation were very clear and easy to follow, and the student was able to answer all the questions from the audience	1 point The visuals (slides) used and the oral presentation were reasonably clear and easy to follow, and the student was able to answer half of the questions from the audience	0 point The visuals (slides) used and the oral presentation were not clear and were hard to follow, and the student was able to answer few or none of the questions from the audience
Manuscript: A clear and coherent document presenting the analysis and operations performed	2 point The manuscript content is very clear and well-presented	1 point The manuscript content is reasonably clear and organized	0 point The manuscript content is not clear and is not well-organized
